Facts About Motherhood

ly every woman now-ndays has medical treatment at the time of child-birth,

but many approach the experience with an organism unitted for the trial of strength, and when the strain is over

strength, and when the strain is over her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of earing for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of childen, and indeed child-birth under right conditions need be no hazard to health or beauty. The unexplainable thing is that, with all the evidence of shattered nerves and broken health resulting from an unprepared condition, women will persist in going blindly to the trial. It isn't as though the experience came upon them unawares. They have ample time in which to prepare, but they, for the most part, trust to chance and pay the penalty.

they, for the most part, trust to chance and pay the penalty. In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy, and strong.

Any woman of would like special advice in regard to this matter is cordially invited to write to Mrs. Pinkham at Lynn, Mass. Her letter will be held in strict confidence.
